# How do happy sheep lower your energy bill?

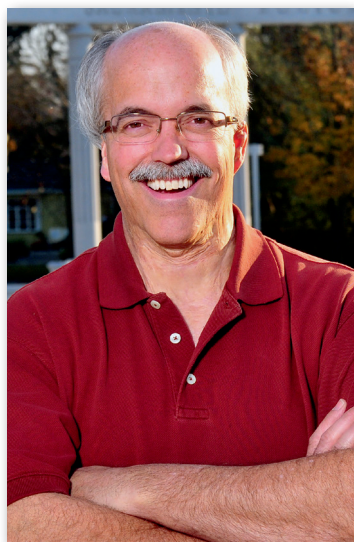

# Rob Kerth for SMUD

SACRAMENTO MUNICIPAL UTILITY DISTRICT - DIRECTOR WARD 5

**“As an engineer, I understand the importance of developing new technologies.** And when we allow technology to work with nature, not against it, we preserve our agricultural resources and save money.

When it comes to green and affordable energy, SMUD is ahead of its time. I’m proud I’ve kept my promise to bring you affordable, green, reliable energy. ”

**Green innovation gives customers more choices and supports the environment.**

The co-location of agriculture with solar panels increases crop production, reduces water loss, lowers maintenance costs, and improves the efficiency of the photo voltaic arrays.

By being on the forefront of earth-friendly innovations, SMUD continues to deliver stable and reliable power that saves you money.
